NUMBER 1

Editorial
B. A. Boley 1 A message from the Editor

W.-C. Tan and **M.-Y. Xu** 3 The impulsive motion of flat plate in a generalized second grade fluid

J. Shi, D. L. S. McElwain and **S. A. Domanti** 11 Plasticity field adjacent to faces of asperities on a rotating roll after initial indentation into a half-space

R. Spallino and **S. Rizzo** 17 Multi-objective discrete optimization of laminated structures

X. D. Hu, R. Day and **P. Dux** 27 Micro-mechanical approximation to the stress field around an inclined fiber of FRCC

G. Bezine 35 On a method of comparison for plate elements in finite element engineering software programs

S. Maghous, P. de Buhan and **L. Dormieux** 45 Non-linear global elastic behaviour of a periodically jointed material

J. J. Telega and **S. Bytner** 53 Piezoelectricity with polarization gradient: homogenization

C. H. Daros 61 A fundamental solutions for transversely isotropic, piezoelectric solids under electrically irrotational approximation

NUMBERS 2–3

Q. Grimal, S. Naili and **A. Watzky** 73 A study of impact wave propagation in the thorax

L.-Q. Chen, N.-H. Zhang and **J. W. Zu** 81 Bifurcation and chaos of an axially moving viscoelastic string

N. D. Caranicolas and **Ch. L. Vozikis** 91 A map for a combination of an oscillator and a diffuser

J. N. Watson and **P. S. Addison** 99 Spectral-temporal filtering of NDT data using wavelet transform modulus maxima

J.-H. He 107 Preliminary report on the energy balance for nonlinear oscillations

O. C. Valdiviezo-Mijangos, R. Guinovart-Díaz, J. Bravo-Castillero, R. Rodríguez-Ramos and **F. J. Sabina** 113 Elastic effective coefficients of fibre-reinforced composite with cubic symmetry constituents in a hexagonal arrangement

PII: S0093-6413(02)00347-6

G. Z. Voyiadjis and **C. R. Song** 121 Multi-scale non-local approach for geomaterials

Q. Yang, L. G. Tham and **G. Swoboda** 131 Micromechanical basis of non-linear phenomenological equations as damage evolution laws

G. Ben-Dor, A. Dubinsky and **T. Elperin** 137 On the Lambert–Jonas approximation for ballistic impact

E. N. Mamiya and **J. A. Araújo** 141 Fatigue limit under multiaxial loadings: on the definition of the equivalent shear stress

E. A. Shirokova 153 The analogues of the basic problems of the theory of elasticity for the special 3-d strain in the plates

B. Druyanov and **I. Roman** 159 Extension of the static shakedown theorems to damaged solids

Y. C. Gao and **H. S. Qian** 165 Analysis of the contact of a rubber notch with a rigid wedge

M. Hanss, S. Oexl and **L. Gaul** 177 Identification of a bolted-joint model with fuzzy parameters loaded normal to the contact interface

I. Ecsedi 189 Bounds for the effective heat conduction coefficient

Announcement

193 9th International Conference on the Mechanical Behaviour of Materials Geneva, Switzerland, May 25–29, 2003

NUMBER 4

N. Hoffmann, M. Fischer, R. Allgaier and **L. Gaul** 197 A minimal model for studying properties of the mode-coupling type instability in friction induced oscillations

L. Ma, L.-Z. Wu and **L.-C. Guo** 207 Dynamic behavior of two collinear anti-plane shear cracks in a functionally graded layer bonded to dissimilar half planes

B. Jin and **Z. Zhong** 217 A moving mode-III crack in functionally graded piezoelectric material: permeable problem

S. Itou 225 Dynamic stress intensity factors around two rectangular cracks in an infinite elastic plate under impact load

J. Fortin, O. Millet and **G. de Saxcé** 235 Mean stress in a granular medium in dynamics

Y. F. Dafalias, M. T. Manzari and **M. Akaishi** 241 A simple anisotropic clay plasticity model

A. D. Drozdov and **A. Dorfmann** 247 The influence of pre-loading and thermal recovery on the viscoelastic response of filled elastomers

M. A. S. Arikan 257 Direct calculation of AGMA geometry factor *J* by making use of polynomial equations

Y. Orcan and **A. N. Eraslan** 269 Elastic–plastic stresses in linearly hardening rotating solid disks of variable thickness

NUMBER 5

H. G. Li, J. W. Zhang and **B. C. Wen** 283 Chaotic behaviors of a bilinear hysteretic oscillator

N. D. Caranicolas 291 From global dynamical models to the Hénon–Heiles potential

X. Li, Y. Chen, Z. Wu and **F. Chen** 299 Bifurcation of nonlinear internal resonant normal modes of a class of multi-degree-of-freedom systems

H. P. Zhu and **A. B. Yu** 307 A contribution to the stability of nonholonomic systems

R. M. Bulatovic 315 On the critical damping in multi-degree-of-freedom systems

M. F. Beatty 321 On the motion of thin plates and shells subject to Stokes damping

X. Han and **G. R. Liu** 327 Effects of SH waves in a functionally graded plate

A. N. Eraslan 339 Von mises yield criterion and nonlinearly hardening variable thickness rotating annular disks with rigid inclusion

K. W. Chandler, J. Peddieson, S. A. Idem and **S. G. Rochelle** 351 An improved 1D fiber dry spinning mass transfer model

Y. Liu and **J. Zhang** 359 Nonlinear dynamic responses of twin-tube hydraulic shock absorber

H. B. H. Gubran and **K. Gupta** 367 Cross-section deformation of tubular composite shafts subjected to static loading conditions

T. Windal and **I. Shahrour** 375 Study of the swelling behavior of a compacted soil using flexible odometer

F. Bourgeois, J. F. Shao and **O. Ozanam** 383 An elastoplastic model for unsaturated rocks and concrete

F. Cormery and **H. Welemane** 391 A critical review of some damage models with unilateral effect

V. Parameswaran and **A. Shukla** 397 Near-tip out of plane displacement fields for dynamic crack propagation in functionally graded materials

X.-F. Wu and **Y. A. Dzenis** 407 Closed-form solution for a mode-III interfacial edge crack between two bonded dissimilar elastic strips

H.-M. Huang, H.-J. Shi and **Y.-J. Yin** 413 Multi-cracks problem for piezoelectric materials strip subjected to dynamic loading

X. Wang and **Z. Zhong** 425 A moving piezoelectric screw dislocation

T. Gültop 431 Existence of shear bands in hyperelastic solids

E. S. Bourloutski, A. M. Bubenchikov and **A. V. Starchenko** 437 The comparison of two approaches to numerical modelling of gas-particles turbulent flow and heat transfer in a pipe

NUMBER 6

Foreword
G. A. Maugin 447 Eshelbian mechanics of materials

A. DiCarlo and **S. Quiligotti** 449 Growth and balance

A. Hattiangadi and **T. Siegmund** 457 Bridging effects in cracked laminates under thermal gradients

A. Chudnovsky and **S. Preston** 465 Configurational mechanics of necking phenomena in engineering thermoplastics

S. Imatani and **G. A. Maugin** 477 A constitutive model for material growth and its application to three-dimensional finite element analysis

C. Trimarco 485 Stresses and momenta in electromagnetic materials

C. H. Wu 493 Chemical potential and energy momentum tensor in single phase mixtures

M. Epstein 501 The Eshelby tensor and the theory of continuous distributions of inhomogeneities

C. Dascalu and **A. Danescu** 507 Thermoelastic driving forces on singular surfaces

P. Podio-Guidugli 513 Configurational forces: are they needed?

R. Kienzler and **G. Herrmann** 521 Fracture criteria based on local properties of the Eshelby tensor

D. Gross, R. Mueller and **S. Kolling** 529 Configurational forces – morphology evolution and finite elements

G. A. Maugin 537 Remarks on the Eshelbian thermomechanics of materials
